

Housing Inspection Standard Update

Project Title	Housing Inspection Standard Update
Project Summary	Interested in housing? In this position, you will have the opportunity to be part of a team that develops and designs an updated housing inspection protocol. Provide research support and analysis on industry best practices in housing maintenance and asset management.
Country	United States

Project Description

We are looking for a General Engineer to play a central role in the research, analysis and design of an updated housing inspection standard. Help us connect the dots between business needs, innovation, and good design by applying your subject matter expertise and research skills to finding solutions and answers to controversial topics and ideas. You will work with a team of dedicated engineers, architects and inspectors to rethink the way in which the organization builds knowledge and ensures quality in its inspection process.
